SUMMARY

Data Scientist and Agentic AI Engineer with strong expertise in **machine learning, AI automation, big data analytics, and end-to-end AI solution development**. Proven track record of designing, deploying, and orchestrating scalable intelligent systems. Specialized in building **autonomous AI agents**, advanced machine learning models, and end-to-end data pipelines which solve complex business challenges. Highly skilled in leveraging modern **AI orchestration** and development tools—including **Claude Code, n8n, Python, SQL**, and major cloud platforms—to automate workflows and drive operational efficiency. Recognized as a proactive and collaborative technical leader who excels at translating business requirements into cutting-edge, data-driven solutions. Strong at translating business needs into technical solutions, supporting team goals.

EXPERIENCE

DATA SCIENTIST, 05/2023 - Current

GilTech Megoldások Startup, Budapest, Hungary

- Provided senior-level technical leadership to development teams on complex AI/ML projects, overseeing data science workflows, model development, and AI solution architecture
- Built scalable AI automation pipelines by automation platform, integrating multiple systems and APIs to create intelligent, end-to-end business process solutions
- Built end-to-end machine learning pipelines for automated data processing, feature engineering, and model deployment
- Maintained a strong track record of successful project delivery for corporate clients across Central Europe, consistently meeting technical specifications and business objectives

RESEARCHER IN DATA SCIENCE & ARTIFICIAL INTELLIGENCE, 09/2024 - Current

University of Liechtenstein, Vaduz, Liechtenstein

- Developed automated AI workflows using n8n, optimizing operational efficiency and minimizing manual interventions.
- Created RAG chatbots to enhance customer engagement and support.
- Published research findings in high-impact journals, contributing to academic discourse.
- Ensured secure implementation of generative AI technologies within enterprise environments.
- Developed innovative methodologies for data collection and analysis, improving research efficiency and accuracy.
- Collaborated with industry partners to apply research findings to real-world applications, enhancing product development.

PYTHON AND MACHINE LEARNING GROUP LEADER (REMOTE), 09/2023 - 06/2024

World-academies Startup, Dresden, Germany

- Developed and delivered extensive data science curriculum encompassing Python programming, machine learning frameworks (PyTorch, TensorFlow),

data analysis libraries (scikit-learn, pandas, NumPy), visualization tools (matplotlib), and advanced AI/LLM technologies from an industry practitioner perspective.

- Held regular team-building workshops, designed to increase team morale and improve productivity.

PROCUREMENT ANALYST TRAINEE, 07/2022 - 08/2022

Nokia, Budapest, Hungary

- Designed Power BI dashboards for effective KPI tracking and data analysis to facilitate informed decisions.
- Automated business processes with custom Power Apps, improving operational efficiency and user engagement.
- Reduced executive reporting time by 60% through implementation of AI-powered analytics for continuous performance monitoring.

DATA ANALYST, 04/2021 - 06/2022

MoneySend Kft, Budapest, Hungary

- Constructed automated data pipelines with Python and SQL for efficient extraction, transformation, and loading of financial data from diverse sources.
- Developed data quality frameworks to ensure accuracy and consistency across financial systems.
- Engaged with clients to understand their data analysis needs and delivered customized solutions.

STATISTICAL ANALYST & BUSINESS MODELING CONSULTANT (PA), 09/2015 - 08/2020

University, Rasht, Iran

- Executed data validation and trend analysis with statistical methods across multiple business contexts.
- Engineered custom Python modules to streamline data analysis processes and maximize efficiency.
- Established data quality frameworks and validation processes to ensure accuracy and reliability of market research findings.
- Utilized advanced Excel functions to manipulate large datasets for insightful reporting.
- Streamlined data collection processes, significantly reducing errors and improving data quality.
- Designed and optimized ML algorithms including clustering, classification, and regression models for market segmentation and forecasting

SKILLS

- | | |
|--|--|
| <ul style="list-style-type: none">• Machine learning• Deep learning• Advanced PYTHON• Advanced R programming• Basic C++ programming• Advanced Lua programming• Basic C# programming• AI architecture, and Transformers• AI Workflow Automation• Agentic AI Orchestration• Cloude Code• MLOps• Clouds (AWS, GCP, Azure, and Hugging Face)• App development with Python | <ul style="list-style-type: none">• SQL• Data visualization• Big Data analytics• Data processing• Statistical data collection• Data pipelining• Model development• Operational efficiency• Strong communication• Collaborative mindset• Multitasking efficiency• Decision-Making confidence• HTML, CSS, JavaScript programming• Power BI, Power Apps, and Microsoft Power Platforms |

EDUCATION

Azad University of Rasht, Rasht, Iran, 09/2019

Master of business administration: Business Administration

MATE University, Budapest, Hungary, 05/2024

PhD: Economic and Regional Sciences

University of Liechtenstein, Liechtenstein, 08/2025

Postdoctoral Researcher in Data Science and AI

LANGUAGES

Persian: First Language

English:

B2

German:

A2

Upper Intermediate

Elementary

HOBBIES AND INTERESTS

Volleyball and team sport, Travel and cultural exploration

ACCOMPLISHMENTS

- Ranked among Hungary's top scientists according to AD Scientific Index (2020-2024)
- Selected among young global researchers for the 8th Lindau Nobel Laureate Meeting in Economic Sciences (August 26-30, 2025)
